Logo Guidelines

Our logo is available for download for use in print or online news coverage of EpiWorks, but we ask that you follow the following guidelines for use of the logo:

- Do not alter the logo except to scale it proportionally.
- Do not use the logo in combination with any other design mark or logo.
- Do not use the logo in place of the name EpiWorks in text.
- Do not place the logo at an angle other than parallel to the bottom edge of the layout.
- Provide "clear space" around the logo; the preferred clear space is at least 2x the cap-height on all sides of the logo.
- Always include the EpiWorks mark, a stylized "e," above the logotype.
- The mark should never stand alone or be reshaped, repositioned, removed, recolored, or used as a decorative element or bullet point.
- Always use the registered (®) symbol with the logo.
- Use the two-color version of the logo only against a white background. In all other situations, use a one-color version (either all black or all white) of the logo.

If you have questions regarding the EpiWorks logo or its use, please contact us at epiworks@epiworks.com.
